

AVI USA
Quarterly Donor Report

March-June 2026

Highlights and Financial Summary

Q2 2026 SUMMARY

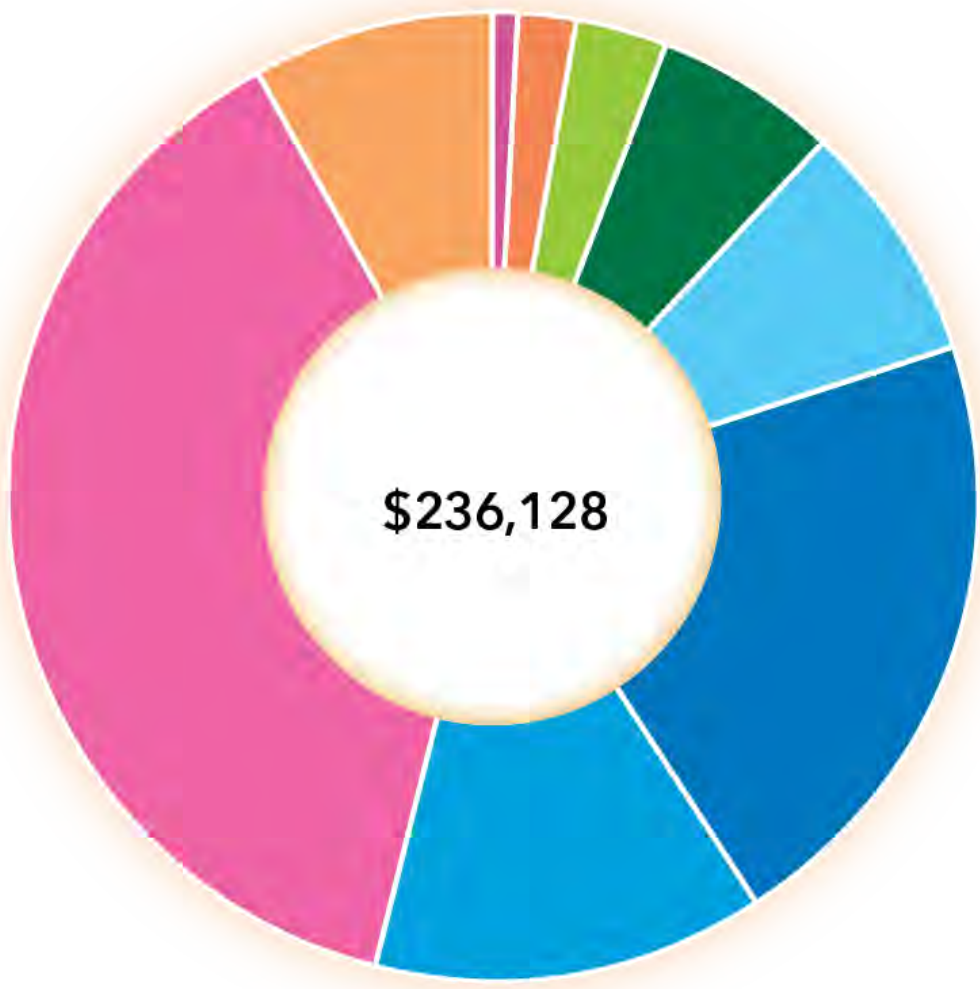

April to June has been another productive period for AVI USA. We hosted a screening of *Matrimandir and I* with Serena on April 18 that drew close to 100 attendees, and we approved nine new scholarships under the Career Development Fund.

Kamadhenu Farm, House of Seva, Fertile East Farm, and Pre Creche have all been added to our list of partners. All our partners that received grants between April of 2025 and March of 2026 have submitted their annual reports, and we sent over $330,000 to our partners this quarter.

AVI USA has been supporting a strategic planning process for Aurokiya Eye Care with help from Rajeev and Ankush, and the completed plan includes monthly financial projections, a fundraising gap analysis, and two potential growth trajectories for the next three years.

Grant activity has been strong, highlighted by a $127,000 award from the Sustainability, Equity, and Diversity Fund for the AV Consulting CIDI Project. Additional grant funding includes $9,000 for the Tibetan Pavilion and $36,000 from Rotary International for Yuvabe.

AVI USA Q2 2026 • Donations Received

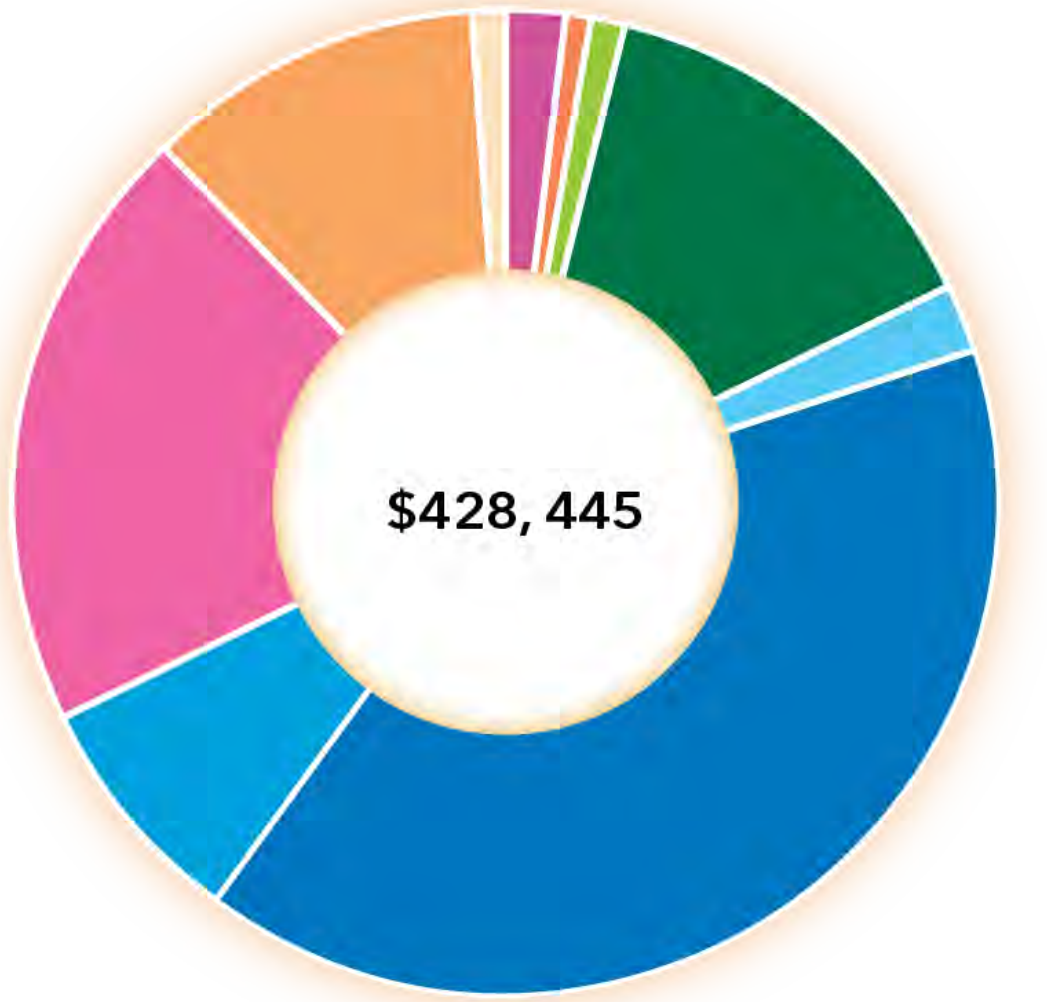

- <1% • $617 • Arts & Culture
- 2% • $3,875 • Community Services

- 1% • $4,035 • AVI USA Projects

TOTAL: $428,445

This chart reflects funds disbursed to AVI USA projects during the quarter, organized by activity area. Disbursements may include funds received in prior periods.

AVI USA HIGHLIGHTS

Matrimandir and I Screening with Serena Aurora-April 18

AVI USA's spring 2026 visit to Auroville deepened relationships with longtime partners, welcomed new and prospective collaborations, and strengthened the stewardship systems that sustain our work on the ground. Across weeks of meetings, trainings, donor gatherings, and site visits, the team connected with more than 16 project partners working in education, ecology, arts, village outreach, research, and sustainable development. From strategy sessions with partner organizations to community gatherings with nearly 100 attendees, the visit reflected AVI USA's ongoing commitment to supporting Auroville's evolving vision through relationship-based philanthropy, accountability, and collaborative growth.

Career Development Fund

Between March and June 2026, AVI USA supported 9 new scholarships for Aurovilians to develop their skills and knowledge. Team members from **Purnam, MorningStar Birth Center, YouthLink, Vidyamandir, Udavi,** and **Lilaloka** received scholarships for educational and professional development opportunities this quarter. These included a retreat study retreat in Nainital, a Polyvagal Certificate Course (Polyvagal Institute), a Surfing Instructor Certification Program and a Rock Climbing Program, a Vedic Chanting – Foundation Certificate Course (Vedic Studies), the Ritambhara Bhaghavad Gita Immersion Program two scholarships for a 2-Year Bachelor's of Education at Paulson's Teacher Training College. a Montessori Teacher Training Program at BrightTech, and a Certificate Course in Applied Mahayana Buddhist Psychology and Ethics.

AVI USA PROJECTS

NEW PROJECTS

AVI USA continued expanding its support for both new and established community initiatives this quarter, including partnerships with **Fertile East Farm**, a regenerative agriculture initiative restoring the land while strengthening food security and ecological resilience through agroforestry, sustainable farming, and integrated dairy and poultry systems; **Kamadhenu Organic Farm**, a new initiative under the Farm Service Trust cultivating fresh food to be freely shared with the community as part of Auroville's prosperity-based model; and **Pre-Crèche**, a community early childhood program providing a safe, nurturing environment for infants and toddlers grounded in Integral Education principles. These projects reflect a broad spectrum of community needs — from regenerative agriculture and food security to early childhood education and care. AVI USA's partnership with SAIIER on school repair and maintenance work remains ongoing, with updates to follow later in the year.

AUROKIYA EYE CENTRE

Aurokiya reached an important milestone during Q2 by completing a strategic roadmap for its next stage of development. The plan establishes three integrated priorities: expanding the Integral Eye Centre, developing a Children's Myopia Clinic, and scaling community outreach through schools and village eye camps. Designed around a sustainable "cross-subsidy" model, the clinical services will strengthen Aurokiya's long-term financial resilience while enabling continued outreach to communities with limited access to eye care. Guided by the World Health Organization's *Eye Care for All* framework, this strategy positions Aurokiya to expand preventive vision care and work toward eliminating preventable blindness across the region by 2030.

AVI USA GRANTS

MORNINGSTAR BIRTH & WOMEN'S WELLNESS CENTER

AVI USA received a $45,000 grant to support the final phase of construction of the Morning Star Birth & Women's Wellness Centre in Auroville, an innovative maternal health initiative dedicated to respectful, community-centered care for pregnancy, childbirth, postpartum recovery, breastfeeding, and early childhood wellbeing. The grant will help complete essential infrastructure and operational readiness work, including solar energy integration, ecological water systems, interior finishing, safety systems, and specialized maternity and newborn equipment. Designed as a calm, sustainable, and human-centered healing environment, Morning Star seeks to create a more humane and preventive model of maternal and family healthcare that integrates clinical support, emotional wellbeing, education, and ecological stewardship within the unique setting of Auroville.

AUROVILLE CONSULTING

Auroville Consulting received a $127,000 grant renewal from the Sustainability, Equity, and Diversity (SED) Fund to continue its **Cities and Industries Decarbonization Initiative (CIDI)** in Tamil Nadu and Puducherry. This renewed support will build on the project's previous achievements by expanding capacity-building programs for government agencies and small and medium-sized enterprises (MSMEs), strengthening greenhouse gas emissions reporting systems, and advancing practical decarbonization strategies. Working in partnership with public institutions, industry associations, and local stakeholders, the initiative aims to accelerate the adoption of clean energy solutions, support climate-conscious policymaking, and help cities and industries transition toward a more sustainable, resilient, and low-carbon future.

AVI USA

AVI USA received two unrestricted donations of $10,000 each to support the organization's ongoing operations and mission. These flexible gifts provide essential funding for the work that makes our programs possible – from vetting, monitoring, and fiscally sponsoring charitable projects to strengthening nonprofit partners, coordinating collaborative fundraising initiatives, supporting educational opportunities through our Career Development Scholarship Fund, and sharing the stories and impact of Auroville with supporters around the world.

General support is especially valuable because it allows AVI USA to sustain the infrastructure behind these efforts, respond to emerging needs, invest in organizational capacity, and help visionary initiatives in education, ecology, health, arts, culture, and community development continue to grow and thrive.
